DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 through 10, drawn to a pharmaceutical composition, classified in class 424, subclass 489.
- II. Claims 11 through 26, drawn to a method of delivering a pharmaceutical composition to a patient, classified in class 604, subclass 58+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

In the instant case, the type of composition as claimed in invention I can be used in a manner that which is materially different than the method from invention II such as one including the step to delivering the composition using a standard syringe with a needle.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
